

# B.S. in Concrete Industry Management (CIM)

## CIM Program Learning Outcomes

The program learning outcomes (PLOs) for CIM are described below.

- (1) an ability to apply knowledge, techniques, skills and modern tools of mathematics, science, engineering, and technology to solve broadly-defined engineering/science problems appropriate to the discipline;
- (2) an ability to apply built environment knowledge, project management skills and business acumen to meet specified needs for broadly-defined Concrete Industry problems.
- (3) an ability to apply written, oral, and graphical communication in broadly-defined technical and non-technical environments; and an ability to identify and use appropriate technical literature;
- (4) an ability to conduct standard tests, measurements, and experiments and to analyze and interpret the results to improve processes.
- (5) an ability to function effectively as a member as well as a leader on technical teams.

## CIM Student Performance and Achievement Information
