

New Jersey Institute of Technology
Department of Engineering Technology
CIMT 310 – Concrete Products and Delivery

COURSE NUMBER	CIMT 310
COURSE NAME	Concrete Products and Delivery
COURSE STRUCTURE	(3-0-3) (lecture hr/wk - lab hr/wk – course credits)
COURSE COORDINATOR/INSTRUCTOR	Ricardo Arocha
COURSE DESCRIPTION	This course will provide the student with a basic understanding of managing, production, order, and delivery process common to all concrete products. An emphasis will be given to planning, organizing, and controlling, at both, Management and Supervisory levels.
PREREQUISITE(S)	CIMT 210
COREQUISITE(S)	
REQUIRED, ELECTIVE OR SELECTED ELECTIVE	Required
REQUIRED MATERIALS	<u>Main Text:</u> N/A Supplementary References: Design and Control of Concrete Mixtures. PCA, 14th, 15th or latest Edition. ACI and PCA Publications. ASTM Standards.
COMPUTER USAGE	Word, Excel, PowerPoint
COURSE LEARNING OUTCOMES (CLO)	By the end of the course students should be able to: <ol style="list-style-type: none">1. Have an understanding of the fundamentals of concrete, properties of freshly mixes concrete, and concrete testing.2. Recognize the types of ready-mix concrete plants, and their operation.3. Understand the ready-mix control systems, troubleshooting, and plant maintenance.4. Have further comprehension of aggregates, cement, fly-ash, slag cement, admixtures, and other additives, as they relate to ready mix concrete manufacturing.5. Comprehension of the ready-mix concrete ordering, and delivering process.6. Be aware of Plant Safety7. Grasp the ready-mix concrete sales process.

CLASS TOPICS

Concrete Basics, concrete ingredients, plant types, ready mix production process, ordering, and delivering, various field visits, guest speakers, concrete construction, production, and safety, CIM National Steering Committee, CIM programs through the country, CIM history, professionalism, cement and SCM materials, admixtures, aggregates, ready mix concrete, pre-cast/pre-stressed concrete, testing and inspection, concrete equipment, concrete reinforcement, concrete formwork, tilt-up construction, work ethic, ready mix market analysis, and ready mix sales.

STUDENT OUTCOMES

The Course Learning Outcomes support the achievement of the following CIM Program Outcomes and TAC of ABET Criterion 9 requirements

OUTCOME 1 Recognize and understand the basic types of ready-mix concrete plants, and the general nature of how the manufacturing process operates. (Relates to CLO 2)

OUTCOME 2 Assimilate and integrate their knowledge, make assessments and utilize their knowledge and understanding regarding ready mix concrete plant control systems. Also, solving relevant problems as it relates to trouble shooting, and plant maintenance. (Relates to CLO 3)

OUTCOME 3 Understand how each ingredient in the ready-mix concrete manufacturing process impacts the final product, and apply this knowledge to further advance the technology/performance of concrete products. (Relates to CLO 4)

OUTCOME 4 Identify, adapt and develop methods to successfully execute the ready-mix concrete ordering and delivery process. (Relates to CLO 5)

OUTCOME 5 Maintain and develop a safe working environment for the individual and the people accessing a ready-mix concrete facility. (Relates to CLO 6)

OUTCOME 6 Understanding at what point in the sales process, the individual is currently in and successfully navigating it. (Relates to CLO 7)

GRADING POLICY

Note: Grading Policy may be modified by Instructor for each Section in the Course)

Attendance & Class Participation	20%
Quizzes	10%
Homework and Projects	10%
Extra Work, activity, Social Events (Min. 3)	5% (Optional Extra Points)
Term Exams (average 1 st ,2 nd ,& 3 rd exams)	30%
Final Exam	30%

ACADEMIC INTEGRITY

NJIT has a zero-tolerance policy regarding cheating of any kind and student behavior that is disruptive to a learning environment. Any incidents will be immediately reported to the Dean of Students. In the cases the Honor Code violations are detected, the punishments range from a minimum of failure in the course plus disciplinary probation up to expulsion from NJIT with notations on students' permanent record. Avoid situations where honorable behavior could be misinterpreted. For more information on the honor code, go to <http://www.njit.edu/academics/honorcode.php>

STUDENT BEHAVIOR

- No eating is allowed at the lectures, recitations, workshops, and laboratories.
- Cellular phones must be turned off during the class hours – if you are expecting an emergency call, leave it on vibrate.
- No headphones can be worn in class.
- Unless the professor allows the use during lecture, laptops should be closed during lecture.
- **Class time interaction is encouraged. You should try to be part of a discussion**

MODIFICATION TO COURSE

The Course Outline may be modified at the discretion of the instructor or in the event of extenuating circumstances. Students will be notified in class of any changes to the Course outline.

COURSE COORDINATED BY

Ricardo Arocha
arocha@njit.edu
(732) 489-4634

HOMEWORK – IMPORTANT

Homework is due the week following the date they are assigned (see Syllabus), and must be given to the Instructor.

GRADING LEGEND

Letter grades will be assigned based on the following scale

GRADE	NUMERIC RANGE
A	90 to 100
B+	85 – 89
B	80 – 84
C+	75 – 79
C	70 – 74
D	60 – 69
F	0 – 59

Note: Cannot pass course if you having failing grades on final exam

SYNCHRONOUS ONLINE INFORMATION

The Instructor will discuss these requirements on the first day of the course and/or posty on their Learning Management System (LMS). Please become familiar

CLASS HOURS: ONLINE & CLASSROOM

Wednesday -Lecture 6 pm – 8:50 pm

COURSE OUTLINE

Week	Dates	Topic
1	1/18	Course Introduction-Guidelines. Lecture: Fundamentals of the Product
2	1/25	Quiz # 1 (last week's Lecture); Lecture: Ordering, Batching and mixing concrete. Control Temperature.
3	2/1	Quiz # 2 (last week's Lecture); Lecture: Proportioning of Concrete Mixtures.
4	2/8	Lecture: Delivery and Placement of Concrete
5	2/15	Quiz # 3 (last week's Lecture); Lecture: Scales, Meters and batching; Sequence & Control
6	2/22	1st. TERM TEST (Lectures from 1/18 – 2/15/23) HOMEWORK ASSIGNMENT
7	3/1	Lectures: Mixing & Mixing Charging, Tolerances, Batch Weight Control, Aggregates Moisture and control
8	3/8	Quiz # 4 (last week's Lecture); HOMEWORK ASSIGNMENT DUE DATE. GUEST SPEAKER: Mr. THOMAS AMENT
9	3/15	SPRING BREAK
10	3/22	Lectures: Concrete Plant Maintenance, Troubleshooting, Star-Up & Shutdown Check Lists.
11	3/29	2nd. TERM EXAM (Lectures from 03/01 – 03/22/23)
12	4/5	Lecture: Plant Controls, The Arithmetic of Batching & Plant Safety. HOMEWORK ASSIGNMENT
13	4/12	HOMEWORK ASSIGNMENT DUE DATE. Guest Speaker: TBD PROJECT ASSIGNMENT FOR 3rd. TERM EXAM
14	4/19	GUEST SPEAKER or PLANT VISIT. TBD.
15	4/26	3rd. TERM EXAM. (PROJECT ASSIGNMENT & WRITTEN EXAM)
16	5/3	1st. READING DAY
17	5/10	FINAL EXAM (ALL LECTURES)
